The whole situation was investigated by a committee of inquiry which sat in 1921 under the chairmanship of Lord Lytton. Arrangements had been made for the Committee to continue their investigations in India in the cold weather of 1921-22, but were abandoned in consequence of the refusal of the Legislative Assembly to vote the necessary grant. This largely accounts for the somewhat tentative form of the recommendations of the unanimous report published in October 1922. The opinion was expressed that the only permanent solution of the problem is to be found in the development of education in India. Attention was invited to the diminution of the number of Indian students proceeding abroad that would result from giving effect to recommendations made for such development by previous commissions, and by the establishment of an Indian Bar. The Committee held that it should be possible to secure admission both to British universities and, subject to certain reservations, to the works of manufacturing firms in Great Britain for all Indian students competent to profit by the facilities afforded, provided that some machinery existed to ensure their distribution to the places best suited to their requirements. Subsequently a committee presided over by Sir Edward Chamberlain recommended the creation of Indian Bars, which should have the effect of much reducing the number of Indians going to the Inns of Court. An Act for the purpose was passed by the Indian Legislature in 1926, but has not narrowed the stream of students at the Inns of Court.

The students have hosts of non-official friends and helpers and the report suggested that there should be a conference of representatives of all organisations interested in the social and intellectual welfare of young Indians in Great Britain to discuss the best means for co-ordinating their efforts. Accordingly Sir Atul Chatterjee held a conference in July 1925, when plans were formulated to help to meet the needs of students more particularly in respect to suitable boarding accommodation in London. The subject had been previously discussed at a meeting of the East India Association (April 27

The year under review marked a big advance by India in the field of sport. No less than five international teams were entertained by India and cricket history was made by the visit of the first official M. C. C. team of cricketers and the playing of the first Test match on Indian soil. Indian cricket was paid a big tribute by the M. C. C. in that they sent out, as captain of their side, Mr. D. R. Jardine, one of the greatest skippers who ever led in England eleven, and a man who was born in India. The men Mr. Jardine led were thoroughly representative of English cricket, even if some of the big names were absent and it was not surprising that India failed to win a Test. She did manage to share the honours in the second game at Calcutta but was fairly and squarely beaten in the other two. To Amarnath, a young all-rounder from the Punjab, fell the honour of making the first century for India in Test cricket and there were scenes of great enthusiasm on the Bombay ground when he reached three figures. India showed that she has cricketers well up to Test match standard.

The year also saw the birth of the Cricket Club of India, from which great hopes are entertained for the future, and the bringing forward of a scheme for a cricket championship of India. The visit of the M. C. C. overshadowed all other cricket and once again the Bombay Quadrangular tournament was held in abeyance.

The inauguration of the Western Asiatic Games which were held at Delhi and Patiala is another achievement which goes to the credit of India. Four countries, Afghanistan, Palestine, Ceylon and India participated and some new records were set up during the games, which were organised on Olympic lines and which were attended by H. E. The Viceroy. Some excellent sport was witnessed at these games, which served to emphasise the urgent need of a properly equipped stadium for the country, especially a good cinder track.

For the first time in the history of hockey India entertained a foreign hockey team, Afghanistan sending a side which played in several centres, but which was beaten by India in the Western Asiatic Games. This was also the first time Afghanistan had entered the field of international sport.

A foreign tennis team also visited India, a team from West Australia, which India proved good enough to beat. Their visit, however, stimulated interest in tennis which is rapidly making progress. Bombay was also fortunate in being able to see F. J. Perry, the famous English player, for a few hours and E. V. Bobb, the Indian champion, took a set off him.

India is rapidly becoming more sport-minded and sport in all its branches is becoming a part of the life of the people. Hockey, perhaps claims the most players, then comes cricket and tennis and more and more are becoming enthusiastic of one or the other, sometimes all three, of these games. Football is played during the Monsoon and this game is growing, the Indians, in Bengal especially, being a very keen soccer enthusiast, while in Bombay, Madras and the Punjab the game is flourishing. It is governed in Bengal by the Indian Football Association, in Western India by the Western India Football Association and in the Punjab by the Northern India Football Association. The chief tournaments are the Indian Football Association Shield played in Calcutta, the Rovers Cup played in Bombay and the Durand Cup played in Simla.

Boxing is another sport which has made progress, though the professional side of the sport appears to have practically died out. There are strong amateur boxing associations in Bombay and Calcutta and the Army organise tournaments frequently all over the country.

Athletics suffer because of the entire absence of tracks in any part of the country. There is a dearth of coaches and very little encouragement for the athlete to keep in training as athletic meetings are comparatively few.

The Turf is the one section which has little to worry about. India possesses some of the finest race courses in the world and at Bombay, Calcutta and Madras, which are the three chief centres enormous crowds attend every meeting. Increased encouragement is being given to Indian bred horses, the best stallions and brood mares are imported, and the sport occupies a high place in the recreations of the people. His Excellency The Viceroy has patronised the turf by entering horses at various meetings and some good races have fallen to him. The Indian Princes support to the turf is well known and the Turf Clubs are flourishing.

Polo has been a favourite game in India for centuries and the Jaipur team earned high praise in Europe. The sport, which had been languishing in Western India, received a big flip by the decision of the Western India Turf Club to organise tournaments.

Golf, Rugby Football, and Yachting are the games of the few, though practically every station has its golf course.

A summary of the chief sporting events of the year appears in the following pages.

His Highness Maharaja Shree Himmat Singhji is the 10th of this illustrious line, and the grand-son of the well known soldier and statesman, His Highness Maharaja Major General Sir Pratap Singhji Sahib of Jodhpur fame. Maharaja Himmat Singh succeeded to the Gadi on the sudden death of His Highness Maharaja Sir Dowlat Singh on the 14th April 1931.

*Born* On 2nd September 1899

*Married* in the year 1908 to Shree Javahar Kumwar Sahiba, the eldest daughter of Raja of Khindera in the Jipur State.

His Highness received his education at the Mayo College, Ajmer, where he remained for 5½ years, leaving it after a brilliant career in 1916. He attained his diploma standing first in the list of candidates from all the Chief Colleges in India and was awarded His Excellency the Viceroy's medal. He won every class prize from the fifth to the diploma, five prizes for English and eleven others for various subjects. He won prizes in each division in succession for riding, and represented the College against the Aitchison College for 3 years at tent pegging, and also at tennis. For several years he was captain of one or other of the junior football or cricket eleven's, and he was one of the best and keenest polo players in the college.

As will be seen, he upheld his family tradition as a sportsman. From boyhood he was keen on hunting and pigsticking and before he had joined the College at the age of 10, he had accounted for many panther and bear to his own rifle. His Highness now keeps a racing stable and has had many successes. These active sports are not his only recreation for he has a good ear for music and is interested in painting and photography.

On leaving the college, His Highness Maharaja Shree Himmat Singhji took an active part in the State administration being appointed to His late Highness' Council, and later for several years was in charge of the administration under His late Highness' personal directions. He gained further practical experience from an extensive tour throughout India in 1929-30. He was therefore well qualified to take up his responsibilities as Ruler of His State when he ascended the Gadi of Idar. Since his accession in 1931, many schemes of improvement have been inaugurated which concern the social welfare of his subjects, their education, industries and agriculture. The present Ruler Maharaja Shri Jorawarsinhji was born on 24th March 1881 and installed on the Gadri in 1896. He was formally invested with full powers on 10th May 1902. He was educated in the Rajkumar College, Rajkot, and was associated with the

Government Administration of the State for more than 7 year preparatory to his being invested with full powers. He is an intelligent Prince who keenly supervises the administration of the State. During his regime many improvements have been made and the State is making good progress. The revenue of the State increased—Its lands have been surveyed and regular settlements introduced—Provision for English education made for the first time and Primary and Secondary education made free throughout the State—Election system sanctioned for Municipality—Free medical relief extended by opening new dispensaries in the district. Many other improvements have been introduced during his regime such as founding of a permanent Famine Relief Fund, granting of liberal tagavi loans to the agriculturists during the time of scarcity. Money is also advanced to the local merchants by way of encouragement at cheap rate of interest. Other improvements of utility such as installation of electricity in the towns of Sant and Rampur, clock tower, public gardens, metalled roads in parts have also been made. The regime of Maharaja Shri Jorawarsinhji has been anything but a bed of roses. Famine and lean years had made the financial condition of the State far from satisfactory, but wise management has been instrumental to keeping its head up.

The Rajaji exercises full powers and enjoys a dynastic salute of 9 guns. Primogeniture is the rule of succession to the Gadri and the Darbar's right of adoption has been recognised and confirmed by Government.

During the Great War the services of the Rajaji Sahib were appreciated by Government. The Government were also pleased to recognise the right of the Rajaji to be a member of the Chamber of Princes.

# The Calendars.

... found at the beginning of this book. Below are given details of the other Calendars in use in India.

The *Jewish* Calendar is in accordance with the system arranged A.D. 358. The Calendar dates from the Creation, which is fixed as 760 years and 7 months before the beginning of the Christian Era, the year is *Luni solar*.

The *Mohammedan*, or era of the *Hijra*, dates from the day after Mahomet's flight from Mecca which occurred on the night of July 15, 622 A.D. The months are *Lunar*.

The *Parsi* year was derived from a combination of the *Hijra* and *Samvat* years by the order of Akbar. It is *Luni solar*. The *Bengali* year seems also to have been related at one time to the *Hijra*, but the fact of its being *Solar* made it lose 11 days each year.

The *Samvat* era dates from 57 B.C., and is *Luni solar*. The months are divided into two fortnights—*sudi*, or bright, and *badi*, or dark. Each fortnight contains 15 tithis, which furnish the dates of the civil days given in our calendars.
